

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1. (Currently Amended) A dielectric material for forming a structure of an integrated circuit, said dielectric material comprising:

a plurality of fluorinated carbon nanostructures; and  
a copolymer layer binding said fluorinated carbon nanostructures to define the dielectric material.

2. (Cancelled)

3. (Previously Presented) The dielectric material of claim 1 wherein said fluorinated carbon nanostructures comprise a plurality of fluorinated carbon nanotubes.

4. (Original) The dielectric material of claim 1 wherein said dielectric material has a dielectric constant of less than about 3.

5. (Original) The dielectric material of claim 1 wherein said structure further comprises at least one conductive feature disposed in said dielectric material.

6. (Previously Presented) The dielectric material of claim 1 wherein said fluorinated carbon nanostructures comprise a plurality of fluorinated carbon buckyballs.

7. (Original) The dielectric material of claim 1 further comprising a cap layer on said dielectric material.

8. (Currently Amended) The dielectric material of claim 7 wherein said fluorinated carbon nanostructures, said copolymer layer, and said cap layer have an effective dielectric constant of less than about 3.

9. (Cancelled)

10. (Currently Amended) The dielectric material of claim [[7]] 1 wherein said fluorinated carbon nanostructures and said copolymer layer have an effective dielectric constant of less than about 3.

11. (Currently Amended) A semiconductor structure formed on a substrate, comprising:  
a dielectric layer comprising a plurality of fluorinated carbon nanostructures and a copolymer layer binding said fluorinated carbon nanostructures; and  
at least one conductive feature in said dielectric layer, said at least one conductive feature electrically isolated from nearby conductive features by portions of said dielectric layer.

12. (Original) The semiconductor structure of claim 11 wherein said dielectric layer has an exposed surface, and further comprising:  
a cap layer of an insulating material at least partially covering said exposed surface, said cap layer having a top surface, and said conductive feature having a top surface substantially coplanar with said top surface of said cap layer.

13. (Cancelled)

14. (Previously Presented) The semiconductor structure of claim 11 wherein said fluorinated carbon nanostructures comprise a plurality of fluorinated carbon nanotubes.

15. (Original) The semiconductor structure of claim 11 wherein said dielectric layer has a dielectric constant of less than about 3.

16. (Original) The semiconductor structure of claim 11 wherein said structure comprises a plurality of conductors electrically isolated by said layer of said dielectric material.

17. (Previously Presented) The semiconductor structure of claim 11 wherein said fluorinated carbon nanostructures comprise a plurality of fluorinated carbon buckyballs.

18. (Previously Presented) The semiconductor structure of claim 11 further comprising:  
a cap layer disposed on said fluorinated carbon nanostructures.

19. (Currently Amended) The semiconductor structure of claim 18 wherein said fluorinated carbon nanostructures, said copolymer layer, and said cap layer collectively have a dielectric constant of less than about 3.

20. (Original) The semiconductor structure of claim 11 further comprising:  
a substrate selected from the group consisting of an interconnect level, a dielectric material, a buried barrier layer, a metallization line, and a semiconductor wafer.

21. (Currently Amended) An integrated circuit comprising a plurality of circuit elements and the semiconductor structure of claim 11, said at least one conductive feature being electrically coupled with at least one of said circuit elements.

22. (Cancelled)

23. (Currently Amended) The dielectric material of claim ~~[[22]]~~ 11 wherein said fluorinated carbon nanostructures and said copolymer layer have an effective dielectric constant of less than about 3.

24-45. (Cancelled)
